Your Cloud Solutions Partner

ABOUT DATABASE PARTNERS

Database Partners is a database development company offering CRM & Cloud Business Solutions. Beginning simply as a reseller of CRM software & services, Database Partners progressively expanded its skills & offerings in the direction of development & cloud technologies, to meet the growing needs of Business Owners. As well as CRM solutions, Database Partners has also focused on services such as IT & Network Support, Website Development, CRM Business Coaching, Email Marketing, IT Training, Customisation, System Integration, Hosting & Application Development. Database Partners have assisted many of our customers worldwide build their own successful businesses and aim to continue in this direction of providing amazing cloud technologies that meet a specific need at a cost effective price.

OUR MISSION

We have recently changed the Mission for our company. We no longer believe in simply selling products for profit as it has no long term benefits for us or for our clients. Instead, we have taken on an approach of creating solutions that liberate our clients, prosper their business and relieve their outlay in time & expenses. Gaining understanding of our clients business pain and therefore resolving it, has resulted in happy employees on both sides (ours and yours). We believe a business relationship involves honesty, transparency and integrity. Words commonly claimed, but rarely demonstrated. In our relationship with you, we will endeavour to build a partnership that seeks to meet your business need & work with you in the way you prefer. If we fail, we encourage you to tell us so we can continually improve. We know you will enjoy working with a company which encourages the very thing it implements - sincere ongoing client relationships!
